

## **Biodynamic Work Shop – Bear River Farm**

**Sunday, September 25th from 11am until 5pm.**

The fall edition of our annual BIODYNAMIC Workshop takes place BEAR RIVER FARMS is located between Digby and Annapolis Royal and currently the only DEMETER certified Biodynamic Farm in Nova Scotia!

Over the past ten years we've developed a full diversified farm organism and keep a very high standard with regular applications of the biodynamic field sprays and compost preparations.

The results of these measures are clearly visible on our farm. That's why we enjoy to share our knowledge and our practical experience with interested farmers and gardeners and those who want to learn more about the forces that work beyond the plant growth and how they can be encouraged or, if necessary, reduced.

Our workshops start with a theoretical part and change into "Hands On" activities after lunch. The workshop takes place rain or shine and is suited for newcomers and for advanced farmers. Please note that the fall edition covers different subjects than the spring edition!

The fees are \$89pp. or \$150 per couple from one farm. (Price includes a full lunch menu and a set of biodynamic compost and field spray preparations).

For registration please reply to this email: [feedback@bearriverfarms.ca](mailto:feedback@bearriverfarms.ca) or visit our website [www.bearriverfarms.ca](http://www.bearriverfarms.ca).

Directions will be sent out after registration.

Best Regards
