accommodation

The Anthroposophical Society
La Société Anthroposophique Canada

Annual General Meeting and Conference
June 24, 25 & 26, 2022

So, what does it mean *to be human* now?

The goal of this year's conference is to create a continuum in time whereby the theme and experience of the Conference is not an isolated event but rather one that builds and develops as we go from this year, into next year and towards the world-wide commemorative events of the fire on December 31, 1922 and for the refounding of the Society at the Christmas Conference 1923/1924.

In person at Saugeen Academy Hanover and
Glencolton Farm, Durham, Ontario.
Or in person with your local branch or group.

What does it mean to be human?

The approach of Ahriman impacts us. In what way do we as human beings experience this encounter? What does it ask of us at this time of curtailment of individual freedom?

This conference strives to underscore the necessity of having a conscious experience of Ahriman's approach. Meeting it with sustaining individual strength enables a socially ennobling response.

So, what does it mean to be human now?

Both social experiences (Saugeen Academy or Branches) will be linked three times via Zoom for the:

1. Friday keynote address
2. Saturday post artistic process moderated cross-Canada sharing
3. Sunday Annual General Meeting

Simultaneous translation of all 3 Zoom events will be provided

Booking for meals and accommodation are separate from conference registration

KEYNOTE SPEAKER

Christoph Wuerscher

Christoph Wuerscher was born in Kitchener, Ontario and grew up in the United States. His parents had been very active in a resistance movement known as the "Confessing Church" before leaving Germany in 1939. Conversations around the dinner table frequently touched on moral, social and spiritual issues. Although Christoph determined to become a psychologist in Grade 7, it took more than two decades before he received his license to practice. While he was at Queen's University in Kingston, pursuing his doctorate in Clinical Psychology, he was introduced to The Christian Community and the ideas of Rudolf Steiner. Both resonated deeply within him and greatly influenced his life and his work. As a clinical and organizational psychologist, he has learned a great deal from sharing in the lives of veterans, police officers, young offenders, executives, politicians, musicians, seminarians, and their spouses and partners. Recently retired, the question of what it means to be human in our times is near and dear to his heart, and he is looking forward to engaging with others on the topic.

Conference fee \$95

Please register and pay with Claudette our administrator.

E-mail: info@anthroposophy.ca
